ACCIDENT... OR CORPORATE SABOTAGE?

Mars Orbit, 2148. The subterranean research terminal Ares-9 has gone dark. Vanguard Orbital Dynamics reported a catastrophic gas explosion, but your physical evidence sweep confirms the truth: the containment breach was a corporate cover-up.

Take on 35 high-stakes forensic investigations across four perilous terminal sectors: • The Bio-Extraction Labs: Mutated flora, argon vents, and stolen genetic crystal cores. • The Sub-Surface Drill Shaft: Subterranean magma chambers and severed seismic blaster lines. • The Ion Propulsion Reactor: Superheated plasma manifolds, tritium coolant, and magnetic field trips. • The Command Deck: Hacked flight recorders, purge manuals, and jettisoned escape pods.

Every investigation features 4 interlocking games: Spectrometer Sensor Sweep, Corrupted Black Box Cipher, Airlock Biometric Matrix, and Emergency Court-Martial Warrant. Contains 100% mathematically proven unique solutions with zero duplicate puzzles.
